

AI Denim Dye Inspection Report

Detailed LAB Analysis

Parameter	Reference	Test
L Value	29.88	63.99
A Value	-0.83	-4.58
B Value	-17.04	-13.98
Similarity %	0	-
AI Confidence	0	-

Comparison ID	COMP-20260625-193231
Inspection Time	25-06-2026 19:32
Reference Fabric	sample1.jpg
Test Fabric	sample2.jpg
Delta E	33.55
QC Status	FAIL

ROI Images and LAB Analysis

AI Industrial Interpretation

• Delta E comparison indicates overall color consistency. • LAB values provide perceptual color measurements. • ROI based analysis eliminates background interference. • Computer vision identifies dominant denim shades. • AI-assisted inspection improves repeatability and quality control.

Quality Assessment

Inspection Status : FAIL
Similarity Score : 0 %
AI Confidence : 0 %
Delta E Value : 33.55

Industrial Observations

- Suitable for denim shade consistency evaluation.
- Helps detect dye variation between batches.
- Supports textile quality control workflows.
- Reduces manual inspection effort.
- Improves production reliability.

Recommendation

AI recommends rejecting this sample due to excessive color deviation from the reference fabric.

Report Information

Generated By	IOTrenetics Solutions AI Textile Intelligence System
Report Type	Industrial Denim QC Report
Generated On	25-06-2026 19:32:39

AI Industrial Interpretation

- Delta E below 2 indicates highly consistent denim dye quality.
- ROI-based comparison minimizes environmental interference.
- LAB analysis provides perceptually accurate industrial comparison.
- AI clustering extracts dominant denim shades.
- Color distribution analysis detects uneven dye concentration.
